

# JONATHAN BLUHM

## Software Engineer

📞 719-243-9318 ✉ [bluhmjc@gmail.com](mailto:bluhmjc@gmail.com) 🏠 Westminster, Colorado

### Technical Skills

---

**Languages:** C#, Java, Python, Typescript, Javascript, C, SQL, Bash, HTML, CSS

**Technologies:** Linux, Windows, Asp.net Core, Node.js, Msbuild, Docker, Gitlab CI, Azure Devops, Splunk, Powershell

**Other:** Data Structures and Algorithms, Agile, Unit Testing, Code Reviews, REST, Microservices, Distributed Systems

### Experience

---

**Geico** **2023 – Present**  
*Engineer II* *Remote*

- Engineered a system to cut down time to test new features from 20 minutes to 1 minute.
- Upgraded an Azure function to have an exception hierarchy and structured logging.
- Updated systems to allow drivers with suspended licenses to get a quote potentially generating up to \$150,000 a year in revenue.
- Collaborated with various engineering teams across Geico to deliver a streamlined commercial auto insurance experience that cuts down the time for customers to get a quote by 50%.
- Assisted in the development of a new Independent Agent commercial insurance product which can save agents 2 hours each day.
- Reengineered an Azure function to have acceptance tests and a domain facade.
- Led knowledge share webinars in webex.

**Sphere Commerce** **2022 – 2023**  
*Software Engineer* *Westminster, Colorado*

- Improved splunk logging by adding timestamps and fixing Serilog sink.
- Cleaned up unnecessary logs made by our logging service, reducing the amount of data logged to splunk every day from 200GB to 10GB.
- Saved \$300/month in Azure costs by identifying and plugging a memory leak in the Cosmos DB service.
- Debugged and corrected 10+ sporadically failing xUnit tests which led to a 30% increase in CI builds completing.
- Increased the stability of the integrated payment application by engineering bug fixes.
- Created documentation for complex systems to aid new developers.

**Dish Network** **2021 – 2022**  
*Software Engineer I* *Superior, Colorado*

- Developed software applications for the Dish Network uplink center that allow internal teams to monitor over 6000 TV channels in real-time.
- Refactored website to be a single page application allowing for interactive UI features.
- Overhauled continuous integration (CI) and continuous delivery (CD) pipelines leading to 50% faster builds.
- Integrated Node.js into 6 year old website to allow for dependency management and Mocha.js unit testing.
- Responded promptly to alerts from Zabbix, maintaining system up time above 95%.
- Mentored new team members.

**United States Navy** **2013 – 2017**  
*Nuclear Electrician* *Groton, Connecticut*

- Functioned as an integral part within a watch team to maintain smooth operation of the reactor plant during complex evolutions.
- Solved problems efficiently by referencing manuals and textbooks.
- Retained the vital documentation for maintenance and history of the reactor control system.
- Communicated effectively with peers from a wide variety of disciplines and backgrounds.

### Education

---

**University of Colorado Boulder** **2019 – 2021**  
*Bachelor of Science in Computer Science* *Boulder, Colorado*

- GPA: 3.76
- Course Work: Linux System Admin, Network Systems, Operating Systems, Robotics, Algorithms, Human Computer Interaction, Data Structures, Cybersecurity, Machine Learning, Calculus 1-3, Probability and Statistics, Linear Algebra
